

Agrometeorology in Australia

Climate forecasting

Plan ahead with climate forecasting that gives you a years' lead-time through accurate seasonal predictions based on similar previous years.

Crop yield forecasting

Get national maps of soil moisture, yield rankings and potential yields based on seasonal forecasts or an average climate.

Productivity trends

See mapped trends (and trend-drivers) in crop yields and water use efficiencies across the Australian grainbelt.

Climate change analysis

Utilise keynote presentations on how the climate has changed since 2000, what has caused these changes, and how crop yields and trends have been affected.
